

T C A T T T C C T C

The image displays a stylized DNA sequence logo for the sequence T C A T T T C C T C. Each letter is represented by a tall, thin vertical bar. The letters T and C are blue, A is green, and C is blue. Below each letter are horizontal bars representing the relative frequency of the four nucleotides (A, C, G, T) at that position. The colors of these bars correspond to the nucleotides: A is green, C is blue, G is red, and T is orange. The sequence is T C A T T T C C T C.
