

G A T T A G T C A C

The image displays a DNA double helix structure. The top strand is composed of the bases G, A, T, T, A, G, T, C, A, C. The bottom strand is composed of the bases C, T, T, A, T, G, A, C, G. The bases are color-coded: G is yellow, A is green, T is red, and C is blue. The strands are connected by horizontal lines representing hydrogen bonds. The sequence GATTAGTCAAC is highlighted in the top strand.
